PROJECT TITLE : Cricket Player Performance Tracking Application
CRICKSTATS

Cricket Player Performance Tracking Application: CRICKSTATS

User Story:

As a cricket player, coach, team manager, or cricket enthusiast, I want to record, manage, and analyse cricket player performance data such as runs scored, wickets taken, batting average, strike rate, economy rate, catches, and match-wise performance so that I can easily understand and evaluate the performance of individual players and teams. The application should provide a simple, organized, and user-friendly platform for maintaining player details, team information, match records, and performance statistics in a centralized system. It should allow users to enter and update batting, bowling, and fielding performance for each match and automatically calculate important statistics based on the recorded data. The system should also help users compare the performances of different players, identify their strengths and areas that need improvement, and analyse performance trends over multiple matches. In addition, the application should provide dashboards, statistical summaries, and analytical reports that make performance information easier to understand and support better cricket-related decision making. By maintaining all performance records in one system, CRICKSTATS reduces the difficulty of managing manual records and provides a convenient way to track and analyse cricket player performance.

1.INTRODUCTION

1.1 Project Overview:

CRICKSTATS – Cricket Player Performance Tracking Application is a software application designed to record, manage, and analyse cricket player performance in an organized manner. It provides a centralized platform for maintaining player information, team details, match records, and match-wise performance statistics. The system allows users to record important batting, bowling, and fielding details such as runs, wickets, batting average, strike rate, economy rate, and catches.

The application helps users analyse player performance and compare different players based on their recorded statistics. It provides performance summaries, dashboards, and reports that make cricket data easier to understand and manage. CRICKSTATS reduces the difficulties of maintaining manual records and provides a simple and efficient platform for players, coaches, team managers, and cricket enthusiasts to track and analyse performance.

1.2 Purpose:

The purpose of this project is to:

- To maintain player and match performance records digitally.
- To record batting, bowling, and fielding statistics.
- To analyse and track player performance.
- To compare player performance using statistics.
- To provide simple dashboards and performance reports.

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Cricket Player	Track my match Performance	Performance records are difficult to maintain	Statistics are often recorded manually	Confused and inefficient
PS-2	Coach /Team Manager	Monitor and compare Player Performance	Analysis Takes more time	Data is stored in different records or files	Difficult and time consuming

PS-3	Cricket Enthusiast/ Administrator	View Player Statistics and performance reports	Fininding required information is difficult	Performance data is not organized in one place	Unsatisfied and inconvenient
------	--------------------------------------	--	---	--	------------------------------

Problem Statements

PS-1	PS-2	PS-3
 A cricket team coach	 A team manager	 A sports analyst
I am: Track player performance across matches	I am: Maintain complete player records	I am: Analyze player trends and generate reports
But: I cannot get accurate statistics easily	But: It takes too much time to update and verify data	But: I face difficulty in comparing performances
Because: Data is stored in different files and formats	Because: Most records are maintained manually	Because: There is no centralized analytics system
 Frustrated and unsure about team selection	 Frustrated and unsure about team selection	 Confused and dissatisfied.

2.2 Empathy Map Canvas

Target Users

- Team Managers
- Coaches
- Analysts
- Salesforce Admins

Empathy Analysis

Aspect	Description
Think & Feel	Need accurate data, better insights

Hear	Feedback from management
See	Multiple data sources
Say & do	Collect statistics manually
Pain	Data errors, delays
Gain	Faster decisions, automation

2.3 Brainstorming

Brainstormed Ideas

- Web-based player management system
- Mobile statistics tracker
- Salesforce-integrated CRM
- AI-based performance prediction

- Dashboard-based analytics

Selected Idea: Salesforce-based performance tracking platform (CRICKSTATS)

3.REQUIREMENT ANALYSIS PHASE

3.1 Customer Journey Map

Journey Stages:

- Login
- Enter Player Data
- Record Match Performance
- Generate Reports
- Analyse Results
- Decision Making

3.2 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	Player Registration
FR-2	Match Performance Entry
FR-3	Dashboard Generation
FR-4	Report Creation
FR-5	Flow Automation

Non-Functional Requirements (NFRs) – CRICKSTATS

NFR-1: Usability

The system should be easy to understand and use by coaches, managers, analysts, and

admins without requiring technical training.

Requirements

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-read dashboards
- Minimal learning curve

Examples:

- A new coach should be able to:
- Log in
- Enter match data
- View player reports
- within a few minutes without special training.

Example: The Salesforce Lightning interface provides drag-and-drop dashboards and user-friendly forms.

NFR-2: Security

The system must protect sensitive player data from unauthorized access.

Requirements

- Role-based access control

- Secure authentication
- Encrypted data storage
- Regular backups

Examples:

- Coaches can view player statistics
- Managers can edit records
- Analysts can generate reports
- Only admins can modify system settings

Example: Salesforce Profiles and Permission Sets restrict access to confidential information.

NFR-3: Reliability

The system should function correctly without failure and store data accurately.

Requirements

- No data loss
- Automatic backups
- Error handling
- System stability

Example:

If a manager enters match statistics and loses internet connection, the data should be saved automatically when reconnected.

Salesforce cloud backup ensures recovery in case of system failure.

NFR-4: Performance

The system should respond quickly and handle large volumes of data efficiently.

Requirements

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal response time

Example:

When an analyst generates a performance report for 100+ players, the report should load within 2–3 seconds.

Optimized Salesforce queries and caching improve response speed.

NFR-5: Availability

The system should be accessible whenever users need it.

Requirements

- 24/7 system availability
- Minimal downtime
- Cloud-based access
- Disaster recovery

Example:

Coaches should be able to access CRICKSTATS even during tournaments at night or on weekends.

Salesforce provides high uptime with cloud hosting.

NFR-6: Scalability

The system should support increasing numbers of users, players, and records.

Requirements

- Handle growing datasets
- Support more teams and leagues
- Expand storage capacity
- Maintain performance under load

Example:

If CRICKSTATS is extended from one team to 50 teams, the system should still perform smoothly.

Salesforce cloud infrastructure automatically scales storage and processing.

3.3 Data Flow Diagram

Data Flow

User → Salesforce UI → Player Object → Match Performance → Reports → Dashboard

3.4 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Analytics	Reports & Dashboards
Automation	Salesforce Flows
Backend	Salesforce Objects
Database	Salesforce Cloud

4. PROJECT DESIGN PHASE

4.1 Problem–Solution Fit

The CRICKSTATS system effectively addresses the key challenges faced in traditional cricket performance management. Earlier, most player and match data were maintained using manual records, which were time-consuming and prone to errors. This issue has been resolved by implementing an automated system through Salesforce, which ensures accurate and efficient data entry and management. The problem of data loss, caused by improper storage and lack of backups, is overcome by using secure cloud storage that safely stores all information and allows easy retrieval. Poor analysis of player performance, due to scattered and unorganized data, is addressed through interactive dashboards that present clear visual insights and reports. Additionally, delays in accessing performance information and generating reports are eliminated by providing real-time reporting features, enabling users to make faster and more informed decisions. Thus, CRICKSTATS successfully bridges the gap between existing problems and modern technology solutions.

4.2 Proposed Solution

Description

CRICKSTATS provides:

- Custom objects (Player, Match Performance)
- Master-detail relationships
- Roll-up summaries
- Lightning App
- Automated flows
- Interactive dashboards

Key Features

- Centralized database
- Live statistics

- Secure access
- Scalable design
- Easy reporting

4.3 Solution Architecture

Architecture Layers

- Presentation Layer (Lightning UI)
- Application Layer (Flows, Logic)
- Data Layer (Objects)
- Analytics Layer (Reports)

5. PROJECT PLANNING & SCHEDULING

5.1 Project Planning

- Agile-based execution

- Object creation → automation → reporting
- Sprint-wise development

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint scheduled

6. Project Development Phase:

Project Flow

Milestone 1: Creation of developer account

Milestone 2: Object Creation

Milestone 3: Tabs

Milestone 4: The Lightning App

Milestone 5: Fields & Relationships

Milestone 6: Roll-up Summary

Milestone 7: Flows

Implementation

Milestone 1 - Salesforce developer account creation:

Activity 1: Creating Developer Account:

Creating a developer org in salesforce.

- 1 Go to <https://developer.salesforce.com/signup>
- 2 On the sign-up form, enter the following details:

Build for the Agentic Enterprise. Sign up for your Developer Edition.

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

- ✓ Build AI agents with Agentforce, grounded in your data with Data 360
- ✓ Connect Claude Code, Cursor, or Codex to your org with hosted MCP
- ✓ Build in the browser with the Agentforce Vibes IDE - no setup required

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data 360

First name	Last name
Monika	M
Job title	Company
Salesforce Agent	Government Thirumagal...
Country/region	Work email
India	monikamanogaran6@g...

☐ I agree to the [Main Services Agreement – Developer Services, Salesforce Program Agreement](#), and [API Terms of Service](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use of

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features, and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days.

We value your privacy. To learn more, visit our [Privacy Statement](#).

1. First name & Last name
2. Email
3. Role: Developer
4. Company: College or Company Name
5. County: India
6. Postal Code: pin code
7. Username: should be a combination of your name and company

This need not be an actual email id; you can give anything in that format:
[username@organization.com](#)

Click on sign me up after filling these.

Activity 2: Account Activation:

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.
2. Click on Verify Account.

3. Give a password and answer a security question and click on change password.

A screenshot of a "Change Your Password" form. The form is titled "Change Your Password" and asks the user to "Enter a new password for lead@sb.com. Make sure to include at least: 8 characters, 1 letter, 1 number". It has three input fields: "New Password" (with a "Good" status), "Confirm New Password" (with a "Match" status), and "Security Question" (with a dropdown menu showing "In what city were you born?"). There is also an "Answer" field with the text "asdfghikl". A blue "Change Password" button is at the bottom.

4. Then you will redirect to your salesforce setup page.

Cross Cloud

Milestone 2 - Object Creation

Activity 1: Player Object

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3. On the Object Manager page, click Create | Custom Object.

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label:** Player
- **Plural Label:** Players
- Enter Record Name Label and Format
 - Record Name : Player Name
 - Data Type : Text
- **In Optional features:** check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status:** check the box for Allow Search.
- **Save**

Activity 2 : Match Performance Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label:** Match Performance
- **Plural Label:** Match Performances
- Enter Record Name Label and Format

Record Name: Customer Account Name

Data Type: Text

- **In Optional features:** check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status:** check the box for Allow Search.
- **Save.**

Milestone 3 - Tabs

Activity 1: Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)
2. Select Object (Player) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab.
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Match Performances.

The screenshot shows the Salesforce Setup interface. At the top, there's a 'Developer Edition' label and a search bar. Below the search bar, the 'Setup' menu is open, showing 'Home' and 'Object Manager'. The 'Object Manager' is selected, and the 'Tabs' section is highlighted in the left sidebar. The main content area is titled 'New Custom Object Tab' and contains the following fields:

- Select an existing custom object or create a new custom object now:**
 - Object:** A dropdown menu with 'Player' selected.
 - Tab Style:** A dropdown menu with 'Balls' selected.
- (Optional) Choose a Home Page Custom Link to show as a splash page the first time your users click on this tab:**
 - Splash Page Custom Link:** A dropdown menu with '--None--' selected.
- Enter a short description:**
 - Description:** A text input field.

At the bottom right of the form, there are 'Next' and 'Cancel' buttons.

Milestone 4 - The Lightning App

Activity 1: Create a lightning app

1. Go to setup page → search “app manager” in quick find → select “app manager”
→ click on new lightning App.

2. Fill the app name in app details and branding as follow

App Name: CRICKSTATS

Developer Name: Auto Populates

Add image optional (if you want to give any image you can otherwise not mandatory) - Add Primary colour Hex or leave it to default.

Then click Next.

3. In App options

Navigation style: Standard navigation

Setup experience: setup

Supporters form factors: Desktop and phone

Then click Next

4. In Utility items

Utility Bar alignment: Default

Then click Next.

5. Navigation items

Select the created Custom Objects and required standard objects

- Players

Match Performances

Reports

Dashboards

6.To Add User Profiles: System Administrator

7. Click Save & Finish.

Milestone 5 : Fields & Relationships

Activity 1: Create Custom fields for Player object

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3. From the object manager page, In the Quick Find box, Search for the custom object you just created: **Player**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.
6. Next, choose a data type as Text. Choosing a data type helps you format the field input.

7. Click on next.

8. Data Type: **Text**

Field Label: Player Name

Field Name: Auto Populates

Length: 50

Click on Next → Next → Save and new

9. Repeat the Same steps for remaining fields

- Data Type: **Text**

Field Name: Auto Populates

Milestone 6 : Roll-up Summary

Activity 1: Create Roll-up Summary for Player object.

Note: - Roll-up Summary can only be created on parent object in Master- Detail Relationship.

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created: **Player**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist. Click Next,
6. Choose a data type as **Roll-up Summary**. Click Next.

Field Label: Matches Played

Field Name: Auto Populates

Summarized Object: Match Performances

Select Roll-up Type: COUNT

Filter Criteria : All records should be included in the calculation.

Click on Next → Next → Save and new.

- Data Type: Roll-up Summary

Field Label: Number of 50's

Field Name: Auto Populates

Summarized Object: Match Performances

Select Roll-up Type: COUNT

Filter Criteria: Only records meeting certain criteria should be included in the calculation.

Click on Next → Next → Save and new.

The screenshot shows a configuration interface with two main sections: 'Select Roll-Up Type' and 'Filter Criteria'.

Select Roll-Up Type: This section has a radio button selected for 'COUNT'. Below it are options for 'SUM', 'MIN', and 'MAX'. To the right, there is a 'Field to Aggregate' dropdown menu currently set to '--None--'.

Filter Criteria: This section has two radio buttons. The first is 'All records should be included in the calculation'. The second radio button, 'Only records meeting certain criteria should be included in the calculation', is selected.

Below the selected filter criteria, there is a table with three columns: 'Field', 'Operator', and 'Value'. The table contains five rows of criteria:

Field	Operator	Value	
Runs Scored	greater or equal	50	AND
Runs Scored	less than	100	AND
--None--	--None--		AND
--None--	--None--		AND
--None--	--None--		

At the bottom of the filter criteria section, there is a note: 'For checkbox fields, enter a value of True for checked or False for not checked. For picklist fields, enter the master picklist field value in your corporate language.'

At the very bottom of the form, there are 'Save' and 'Cancel' buttons.

- Data Type: Roll-up Summary

Field Label: Number of 100's

Field Name: Auto Populates

Summarized Object: Match Performances

Select Roll-up Type: COUNT

Filter Criteria: Only records meeting certain criteria should be included in the calculation.

Click on Next → Next → Save and new.

Milestone 7 : Flows

Activity 1: Screen Flow

1. Go to setup, Type Flow in quick find box → Click on the Flow and Select the New Flow.

2. Select Screen Flow and click Create.

3. Click (+) Icon on the flow builder and Select **Screen Component**.

Label: Players screen

API: Players screen

Select the **Picklist** component and place it on the screen.

Label: Team

API: Team

From Component Pane on the left side select **Component Type:** Picklist

Data Type: Text

Choice: Click New Choice Resources

Resource Type: Picklist Choice Set

API Name : Team

Object : Player

Data Type : Picklist

Field : Team

Click Done.

The screenshot shows the 'New Choice Resource' dialog box. The 'Resource Type' is set to 'Picklist Choice Set'. The 'API Name' is 'Team'. The 'Object' is 'Player'. The 'Data Type' is 'Picklist'. The 'Field' is 'Team__c'. The 'Sort Order' is 'Default Order of Field'. The 'Description' field is empty. The 'Cancel' and 'Done' buttons are at the bottom right.

4. Click (+) Icon on the flow builder and Select **Get Records Component**.

Label : Players

API Name : Players

Object : Player

Filter player records :

Field : Team

Operator : Equals

Value : Click New Resource

Resource Type : Variable

API Name : Dynamic

Data Type : Text

Default Value : Screen component : Team (Picklist)

5. Click (+) Icon on the flow builder and Select **Screen Component**.

Label : Player info

API Name : Player info

From Component Pane on the left side select **Component Type :** Data table

API Name : Player info table

Label : Data Table

Configure Data Source : Source Collection : Players from players (Player)

In Configure Columns : Add all the required Columns

Profile Picture | Player Name | Total Runs | AVG Score | Batting Style | Bowling Style
| Matches Played | Number of 50's | Number of 100's

Click Done.

Click Save.

Flow Label : Player Flow

Flow API Name : Player Flow

Activity 2: Flow on Home Page

1. On your CRICKSTATS Application on the top right of the Navigation Bar click on **Personalize your nav bar icon (Pencil Icon)** and Add Home Page and click Save.

2. Remove all other components and Add **FLOW** component from the standard components on the left side.

3. **Flow : Players Flow**

4. Click **Save** and **Activation**.

5. Click on **App Default** and select **Assign to Apps**.

6. Select **CRICKSTAS** App and Click **Next** and then click **Save**.

7. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the Salesforce Lightning user interface to verify the correct functioning of all implemented features in the CRICKSTATS system. These include record creation for Player and Match Performance objects; validation rule checks for mandatory fields, score limits, and input constraints; verification of record type behaviour for Domestic and International match categories; and flow execution for automatic updating of player statistics and data consistency. The functionality of roll-up summary fields was also tested to ensure accurate calculation of total runs, wickets, averages, and performance metrics.

In addition, system performance was evaluated by monitoring response time during data entry, report generation, and dashboard loading. The application was tested under multiple user interactions to ensure stable performance without delays. Screenshots of generated reports and interactive dashboards were documented to confirm accurate data visualization, real-time updates, and reliable performance tracking. These testing activities ensured that the CRICKSTATS platform met both functional and performance requirements and was ready for deployment.

NOTE: Enter some records in the Player Object and Match Performance Object to get the results.

1. Select one Team from the Picklist and Click **Next**.

8. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized system
- Real-time analytics
- Secure platform
- Scalable design
- Reduced manual work

Disadvantages

- Requires Salesforce license
- Internet dependency

- Limited offline access

9.CONCLUSION:

CRICKSTATS successfully implements a cloud-based cricket performance tracking system using Salesforce. The system automates data management, improves reporting accuracy, and supports informed decision-making.

The project demonstrates practical application of SDLC, Agile methodology, and CRM-based development.

10. FUTURE SCOPE

- Mobile application integration
- AI-based performance prediction
- Video analysis integration
- Player ranking system
- Public statistics portal
- Multi-league support

11. APPENDIX

- Salesforce Objects & Fields
- Manual match statistics
- Flow Configurations

THANK YOU
